The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/587,775	Applicant(s) ELMEN ET AL.	
	Examiner Louis Wollenberger	Art Unit 1635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 July 2006.

DETAILED ACTION

Status

Applicant's preliminary amendment to the claims, filed 7/28/2006, is acknowledged. With entry of the amendment, claims 30-57 are pending and subject to restriction as follows.

Election/Restrictions

This application contains claims directed to more than one species of the generic invention: a modified siRNA. See claim 30. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species of modified siRNAs as now claimed differ one from the according to 1) the particular position of the modified RNA nucleotide, as required by at least claims 31, 34-36, 41-43, 50-52, and 55; and 2) by the particular type of RNA nucleotide modification in the siRNA, as required by at least claims 32-55. The claims recite several alternative positions and modifications, resulting in a multitude of possible species of modified siRNA.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. To be fully responsive, Applicant must elect a single position and a single type of modification, thereby selecting a single species of modified siRNA from among the many now recited by claims 31-55. Applicant is encouraged to review each claim 31-55 to ensure the species election identifies a single alternative when multiple alternatives are recited. For example, should Applicant elect LNA as the modified nucleotide (claim 45), Applicant must also further elect one species of LNA from

Art Unit: 1635

claims 46-48, such that the narrowest embodiment of each species, as defined by the claims, is identified for search and examination.

The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: Claim 30.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature of each species is the particular set of features required by the species, such as the position(s) of the modified nucleotide(s) and the chemical nature of the modified nucleotide. These feature(s) being unique to each species and not shared by any other cannot be the unifying feature. Therefore, the species lack unity of invention *a priori*.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1635

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
